Tehran to Host Minex 2015

Tehran's Grand Masala will play host to Iran's Mines and Mining Industries Exhibition and Conference on Investment Opportunities, otherwise known as Minex 2015, during September 19-October 1. The event is aimed at presenting the latest technologies and equipment, services, machinery for mines and mining industries in exploration, excavation, processing, production and export as well as introducing investment opportunities in Iran for mining companies worldwide, according to the exhibition's website (www.minex.ir). Iranian Mining Engineering Organisation, in cooperation with Iranian Mines and Mining Industries Development and Renovation Organization and the Ministry of Industries, Mining and Trade is organizing the event.

Home Appliances Exhibition

A home appliance fair featuring direct selling of domestic and foreign products is coming to Tehran.

IRANIAN ECONOMIC DAILY

Polish Delegation Surveys Avenues of Economic Coop.

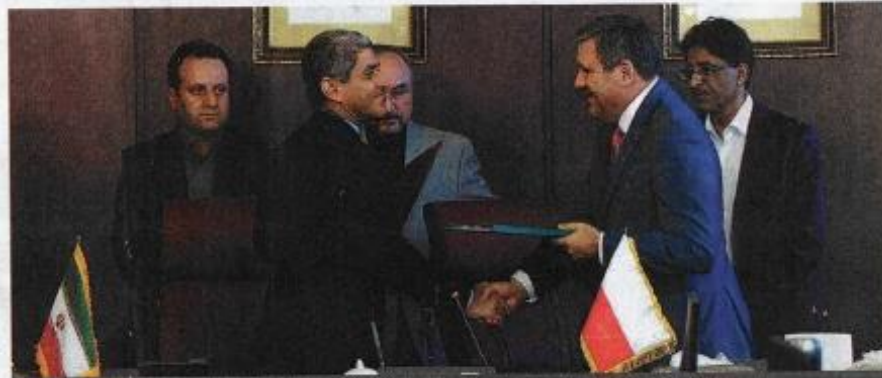

According to the Polish economy minister, Warsaw is willing to cooperate with Tehran in the fields of transportation, agriculture, oil, gas and banking among others

Iran and Poland discussed areas of economic cooperation in meetings between Poland's Economy Minister Janusz Piechociński and Iranian ministers on Saturday.

Poland is seeking to strengthen ties with Iran by launching shipping lines, a Warsaw-Tehran flight in July 2016 and putting their banking house in order, said the Polish economy minister, who is also deputy prime minister, in a meeting with Iran's Minister of Economic Affairs and Finance Ali Tayebnia.

"Oil, gas, transport and agriculture are other sectors in which my country is willing to cooperate with Iran," Piechociński added. He is heading a high-ranking delegation of Polish officials and businessmen to Tehran.

A memorandum of understanding on developing economic ties was signed on the sidelines of the two ministers' meeting.

Polish Economy Minister Janusz Piechociński (left) shakes hand with Iranian Minister of Economic Affairs and Finance Ali Tayebnia in Tehran on Saturday.

to initiate financial activities. Iran is also set to dispatch banking delegations to Poland if needed, he added.

"We are certain that the EU acted in good faith during the nuclear talks since scores of delegations and European ministers headed to Iran within two

and Urban Development Abbas Akhoundi. "The two countries' road and transport agreement dates back to 40 years and drives know Iran-Poland route like the back of their hand. It is six months now that more than 16 international shipping lines berth in Bandar Abbas,

various sectors thanks to the conditions following the Joint Comprehensive Plan of Action," announced the ICOWA head referring to the nuclear deal signed between Iran and P5+1 on July 14.

Bilateral cooperation in agriculture, food, mining,

Swiss Businesses Rally to Weigh Iranian Opportunities

At an elegant hotel in downtown Zurich, Switzerland's financial center, Swiss business executives gathered to learn about Iran. The event was a trade conference held late in August, organized by Switzerland's Global Enterprise, a private association that is partly financed by the government to encourage international business.

At first, only a handful of people were expected to come. However, later, there were 350 business leaders mostly Swiss, but many Iranians too, Swissinfo reported.

"Iran has been talked about as a re-emerging virgin market with huge potential. So we thought that let's have a go," says Jean-Luc Bühler, international business development manager at V-ZUG AG, Swiss household appliance manufacturer which had sent representatives to the conference.

Most of the talk was about risk and that it's worth taking. That's the push to the Swiss.

Some say Iran's bureaucracy could be a risk. However, there is also the issue of sanctions.

The Swiss government began imposing sanctions in 2007 in keeping with other western countries. Then last year it began lifting them in line with trade partners. That's creating new opportunities.

"We do not think really that the risk for us will be big. Because we are working with local partners who we kind of

know already from before," said Bühler.

The Swiss government estimates that exports to Iran, more than \$620 million last year, could double or even triple within a decade. That would still come to 1% of Swiss exports.

But over the longer haul, there is so much potential in a land 10 times the population of Switzerland. For instance, Iran has 55 million cellular phone subscribers, almost as many as France or Britain. Moreover, Iran has significant oil and gas reserves and a well-developed stock market where more than 500 companies trade.

Philippe Weill, former Swiss ambassador to Iran, says

The Swiss government estimates that exports to Iran, more than \$620 million last year, could double or even triple within a decade.

Iran is a big, new market with "amazing stability" compared to other countries in the region, while Tehran "can guarantee that stability for whoever joins the market."

Shafiq Nozani-Melli, managing director of Tehran office for Bühler Group, a Swiss technology provider in over 100 countries, and chairman of the Iran-Switzerland Chamber of Commerce, also has a finger on the pulse of change underway.

"Iranian business environment is comprised of numerous elements and these elements you have to be very careful about. Iran's potential is tremendous in the region. It's a country of 80 million; it has one of the highest educated forces as far as employment is concerned. The workforce is very confident," he said.

Switzerland and Iran have a long shared history. Swiss watchmakers settled in the Persian Empire in the 17th century and formal trade relations between the two countries began in 1673 with a friendship-and-trade treaty. There are now three formal economic treaties between the two sides.

"In the immediate timeframe, it is a great opportunity to enter Iran with high-tech products which are needed in the exploration, exploitation and refinement fields of gas and oil," says Weill, adding that the biggest stumbling block to trade relations with Iran will have to be fixed: money transactions, a problem created by the US embargo on Iranian trade.
