ALUMINIUM SYSTEMS

QUALITY & AESTHETICS

Valvis at a glance

The Valvis Company was founded in 1966. The objective of the company was the creation of metallic structures, which, in time, became chiefly aluminum.

At present, the company has been bequeathed to the second generation, focusing on the creation of high quality products and especially curved or rare aluminum structures.

The Valvis Company can now be characterized as a specialized company in the field of complex and quality aluminum structures. Our experience and expertise has given us the qualification to create rare and unique structures.

Facilities

The construction, administration and exhibition sectors of our company are all located in Megara in our privately owned facilities. The Valvis Company has incorporated in its production line, any kind of special aluminum structure.

The main characteristic of our production is the emphasis which is put on details and the minimization of details.

Quality Standards

Valvis Company is certified to ISO 9001:2008 and also the SEKA Q-System trademark, which ensure and guarantee the high quality of the end product that the customer receives. Each product is created according to the customer's specifications and meets all the quality requirements, set by our company.

The aluminum systems, the glazing and the components we use, are all products of internationally reputable companies.

The combination of the quality standards alongside of the high-quality materials, guarantee the best quality of the final product.

Technical Issues

Products

Our company is capable of manufacturing all different kinds of aluminium constructions, such as:

- Opening frames
- Sliding frames
- Atriums and special structures
- Curved and arched windows
- Main & auxiliary doors
- Shutters and blinds
- Roller shutters
- All types of screens

Colors

Our structures can be painted in a huge range of colors, applying Powder Coating (ral, metallic), Anodizing, or Wood Finishing.

All paintings are certified by the internationally recognized QUALICOAT and also have an extra SEASIDE certification. This ensures the highest protection and endurance of the aluminium surface against corrosion and mechanical strain.

Why to choose us

Our company offers:

- Long-time experience and know-how
- Quality and aesthetics
- Consistency and reliability
- Excellent cooperation and a guaranteed ally
